RE: Testimonial - Advantage Tech Inc., Services

Dear Sam,

Through my recent career transition I found the career counseling services offered by Advantage Tech., to be first rate. In particular, the timely access, support and legal advice provided by yourself and your staff members. I most appreciated the unrestricted access to your council and advice, as well, your quick response to inquiries and voice messages.

The professional resume review and support to my business plan were also greatly appreciated. Keep up the good work!

TransWest has evolved to be a top quality supplier of Engineering Services targeting Oil and Gas customer related controls, electrical and information system needs. For a complete profile of our services and principal partners, please refer to our website at:
